

Temperature Pen Model 560-0235

*Factory calibrated in
Degrees Fahrenheit.
(Can also be ordered in Celsius)*

Benefits:

- ◆ **Easy dip and read measurement**
- ◆ **Type K Mineral Insulated
Stainless Steel Removable Probe**
- ◆ **Fits in shirt pocket with clip**
- ◆ **250 Hour battery life**
- ◆ **Cost less then most electrodes**

Product Description:

A Temperature Pen is ideal for plating managers for checking plating tanks where temperature is critical. Its convenience encourages frequent checks which can often ward off more serious and costly malfunctions before they occur. The Temperature Pen easily fits in a shirt pocket and the immersion probe quickly screws in place for dipping in the bath. Four replaceable LR44 batteries are included providing a life expectancy of 250 hours.
